

# Nuclear fission

*A key low-carbon power generation option.*

- 79 non NNUF live grants, £66m
- 16 live NNUF grants, £55m
- Challenges in this research area include:
  - Decommissioning and disposal, and legacy waste
  - Technological challenges for new nuclear build
  - Fuel reprocessing
  - Manage delivery of research infrastructure requirements
  - Materials

## Main Activities

- Engaging internationally

UK India with DAE, delayed due to CV19

NEUP; poss. next year

UK Japan with MEXT poss. next year

UK R.o.Korea with MSIP

- NNUF Phase 2a (just closed)
